International Master of Biology

Evaluation of the practical work (including protocol)

Practical Module	
Name of student	
Name of supervisor	
Title of project	
Date of evaluation	

Project execution	excellent	good	satis- factory	poor	not sufficient
Scientific workflow					
Independence					
Trouble shooting competence					
Knowledge about the scientific background of the project					
Teamwork and team-cooperation					
Planning of experiments and experimental design strategies					
Precision and effectiveness					
Good scientific practice					
Overall organization of lab work					
Laboratory protocol					
Other comments on the practical work:					

Protocol	excellent	good	satis- factory	poor	not sufficient
The protocol is consistent with the format of a scientific publication					
The length of the protocol is appropriate for the project					
Spelling, grammar and language					
Introduction					
Description of scientific background					
Statement of the goal of the project					
Results					
Structure, legibility and understandability of the results section					
Statistical evaluation of results (if applicable)					
Clarity of figures and tables					
Clarity and understandability of figure legends					

Discussion			
Critical discussion of the results			
Outlook on further experiments presented			
Literature			
Citation of relevant literature			
Other comments on the protocol:			

Oral Presentation(s)	excellent	good	satis- factory	poor	not sufficient
Clarity and understandability					
Organization of presentation					
Explanation of results					
Overall speed of presentation					
Length of the presentation					
Explanation of methods					
Delivery of take home message					
Proficiency in English					
Optical Presentation / Visualization of results:					
Ratio of text to figures					
Preparation and quality of pictures					
Structuring of individual slides					
Spelling, grammar and language p					
Other comments on the oral presentation:					

Other general comments:
